CAUTION

Temporary changes or defects in aids to navigation are not indicated on this chart. See Local Notice to Mariners.

CAUTION

Improved channels shown by broken lines are subject to shoaling, particularly at the edges.

CAUTION

Small craft should stay close of large commercial and government vessels even if small craft have the right-of-way.

Air craft should avoid areas where the skin divers flag, a red square with a diagonal white stripe, is displayed.

RADAR REFLECTORS

Radar reflectors have been placed on many navigational aids. Individual radar reflector identification on these aids has been omitted from this chart.

AIDS TO NAVIGATION

Consult U.S. Coast Guard Light List for supplementary information concerning aids to navigation.

WARNING

The prudent mariner will not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List and U.S. Coast Pilot for details.

CAUTION

WARNINGS CONCERNING LARGE VESSELS

The "Rules of the Road" state that recreational boats shall not hamper the safe passage of vessels which can navigate within a narrow channel or fairway. Large vessels may appear to move slowly due to their large size but actually travel at speeds in excess of 12 knots, requiring a great distance in which to maneuver or stop. A large vessel's superstructure may block the wind with the result that sailboats and sailboards may unexpectedly find themselves in the path of a large vessel. Large vessels may not be able to see small craft close to their bows.
