THE FOLLOWING OF THE ABOVE PUBLIC MARINE FACILITIES ARE SHOWN ON THE CHART BY INDEPEN AMBERS AND LEGEND:
THE FUEL FACILITY - THE PUMP OUT STATION - THE DIESEL FUEL FACILITY - THE LIQUID PROPANE GAS FACILITY - THE TRANSIENT SLIP FACILITY
THE THROUGH-HULL PUMP OUT STATION IS DEFINED AS FACILITIES AVAILABLE FOR PUMPING OUT BOAT HOLDING TANKS

CAUTION

Temporary changes or defects in aids to navigation are not indicated on this chart. See Local Notice to Mariners.

CAUTION

Improved channels shown by broken lines are subject to shoaling, particularly at the edges.

CAUTION

Small craft should stay clear of large commercial and government vessels even if small craft have the right-of-way.

Large ocean going cruise ships press where the ship drives flag, a red square with a diagonal white stripe, is displayed.

RADAR REFLECTORS

Radar reflectors have been placed on many floating aids to navigation. Individual radar reflector identification on these aids has been omitted from this chart.

AIDS TO NAVIGATION

Consult U.S. Coast Guard Light List for supplemental information concerning aids to navigation.

WARNING

The pryotechnic signals are not rely solely on any single aid to navigation, particularly on floating aids. See U.S. Coast Guard Light List and U.S. Coast Pilot for details.

CAUTION

WARNINGS CONCERNING LARGE VESSELS

The "Rules of the Road" state that recreational boats shall not impede the passage of a vessel that can navigate only within a narrow channel or fairway. Large vessels may appear to move slowly due to their large size but actually may be moving at speeds that are too fast for safety and distance in which to maneuver or stop. A large vessel's superstructure may block the wind with the result that vessels that are underway and under control are suddenly unable to maneuver. Bow and stern waves can be hazardous to small vessels. Large vessels may not be able to see small craft close to their bows.

Last Correction: 10/1/2015. Cleared through: LNM: 3915 (9/29/2015), NM: 4015 (10/3/2015).

This chart was distributed as a PDF (Portable Document Format). Printing PDFs may alter the chart scale, color, or legibility that may impact suitability for navigation. Printed charts provided by NOAA certified Print on Demand (POD) providers fulfill a vessel's requirement to carry a navigational chart "published by the National Ocean Service" in accordance with federal regulations, including but not limited to 33 C.F.R. 164.33(a), 33 C.F.R. 164.72(b), and 46 C.F.R. 28.225(a). POD charts meet stringent print standards and can be recognized by an official certification of authenticity printed on the chart. A list of POD providers can be found at: nauticalcharts.noaa.gov/pod

NAUTICAL CHART 11467
INTRACOASTAL WATERWAY

FLORIDA
WEST PALM BEACH TO MIAMI

Chart 11467 43rd Ed., Jan/12

Published at Washington, D.C.
U.S. DEPARTMENT OF COMMERCE
NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
NATIONAL OCEAN SERVICE
COAST SURVEY

MERCATOR PROJECTION AT SCALE 1:40,000
SOUNDINGS IN FEET AT MEAN LOWER LOW WATER
NORTH AMERICAN DATUM OF 1983
(WORLD GEODETIC SYSTEM 1984)
Additional information can be obtained at nauticalcharts.noaa.gov.

HEIGHTS
Heights in feet above Mean High Water.

AUTHORITIES
Hydrography and topography by the National Ocean Service, Coast Survey, with additional data from the Corps of Engineers, Geological Survey, and U.S. Coast Guard.

SUPPLEMENTAL INFORMATION
Consult U.S. Coast Pilot 4 for important supplemental information.

CAUTION
This chart has been corrected from the Notice to Mariners (NM) published weekly by the Coast Guard and the Local Notice to Mariners (LNM) issued by the Mariners (LNM) issued periodically by each U.S. Coast Guard district to the dates shown in the cover off hand corner. Chart updates corrected from Notice to Mariners after the dates shown in the lower-left hand corner are available at nauticalcharts.noaa.gov.
