Coquille River Entrance NOAA Chart 18588

A reduced-scale NOAA nautical chart for small boaters When possible, use the full-size NOAA chart for navigation.

- Complete, reduced-scale nautical chart
- Print at home for free
- Convenient size
- Up-to-date with Notices to Mariners
- Compiled by NOAA's Office of Coast Survey, the nation's chartmaker

Published by the National Oceanic and Atmospheric Administration National Ocean Service Office of Coast Survey

What are Nautical Charts?

Nautical charts are a fundamental tool of marine navigation. They show water depths, obstructions, buoys, other aids to navigation, and much more. The information is shown in a way that promotes safe and efficient navigation. Chart carriage is mandatory on the commercial ships that carry America's commerce. They are also used on every Navy and Coast Guard ship, fishing and passenger vessels, and are widely carried by recreational boaters.

What is a BookletChart[™]?

This BookletChart is made to help recreational boaters locate themselves on the water. It has been reduced in scale for convenience, but otherwise contains all the information of the full-scale nautical chart. The bar scales have also been reduced, and are accurate when used to measure distances in this BookletChart. See the Note at the bottom of page 5 for the reduction in scale applied to this chart.

Whenever possible, use the official, full scale NOAA nautical chart for navigation. Nautical chart sales agents are listed on the Internet at http://www.NauticalCharts.NOAA.gov.

This BookletChart does NOT fulfill chart carriage requirements for regulated commercial vessels under Titles 33 and 44 of the Code of Federal Regulations.

Notice to Mariners Correction Status

This BookletChart has been updated for chart corrections published in the U.S. Coast Guard Local Notice to Mariners, the National Geospatial Intelligence Agency Weekly Notice to Mariners, and, where applicable, the Canadian Coast Guard Notice to Mariners. Additional chart corrections have been made by NOAA in advance of their publication in a Notice to Mariners. The last Notices to Mariners applied to this chart are listed in the Note at the bottom of page 7. Coast Pilot excerpts are not being corrected.

For latest Coast Pilot excerpt visit the Office of Coast Survey website at http://www.nauticalcharts.noaa.gov/nsd/searchbychart.php?chart=185 88.

(Selected Excerpts from Coast Pilot)
Coquille River is 18 miles N of Cape
Blanco. Some fishing boats operate
from Bandon, about 0.8 mile above the
mouth.

Coquille Point is 0.6 mile S of Coquille River entrance. Several rocky islets extend 0.5 mile off the point and rocks showing breakers in any swell extend 1.2 miles W and a mile NW.

Coquille Rock, 1.6 miles NW of the point, is covered 28 feet and breaks in heavy weather.

A long, low area of shifting dunes is N of the Coquille River entrance. The tower and dwelling of an abandoned lighthouse, marked by a private

light, is near the inner end of the N jetty.

COLREGS Demarcation Lines.—The lines established for the Coquille River are described in **80.1315**, chapter 2.

The entrance to Coquille River is protected by jetties; a light and sound signal are on the S jetty. A **Federal project** provides for a depth of 13 feet from the entrance to Bandon. (See Notice to Mariners and latest editions of charts for controlling depths.) The channel is subject to frequent change, and the deepest water is not always on the entrance range. Local knowledge is essential when the bar is rough. It is reported that the bar breaks even in calm seas and mariners should favor the N in approaching the entrance range. The reported depth above Bandon is about 6 feet to Coquille, 21 miles above the entrance.

Coast Guard.—A Coast Guard motor lifeboat is stationed at the mooring basin at Bandon on the S side of the river about 0.8 mile above the entrance.

The Coast Guard has established Coquille River Regulated Navigation Area Warning Sign, a seasonal **rough bar advisory sign**, 29 feet above the water, visible from the channel looking seaward on the S shore just N of the Coast Guard station, to promote safety for small-boat operators. The sign is diamond-shaped, painted with an international orange border, and with the words "Rough Bar" in black letters. The sign is equipped with two quick flashing amber lights that will be activated when hazardous conditions exist and the bar is restricted to recreational and uninspected passenger vessels. Boaters are cautioned, however, that if the lights are not flashing, it is no guarantee that sea conditions are favorable.

A small-craft basin, on the S side of the river about 0.9 mile above the entrance, has about 180 berths and a launching ramp; marine supplies are available. Fuel is available by truck. In 1999, the controlling depth was 12 feet from the main channel to the basin, with depths of 5 to 8 feet in the basin. The 310-foot wharf of a former lumbermill, NE of the small-craft basin, has reported depths of 12 feet alongside. A machine shop is at Bandon.

A highway bridge, 3 miles above the entrance, has a lift span with clearances of 28 feet down and 74 feet up. (See **117.1 through 117.59** and **117.875**, chapter 2, for drawbridge regulations.) In 2003, the lift span was inoperable and in the closed position. An overhead cable E of the bridge has a clearance of 72 feet.

The village of **Prosper** is 4 miles above Coquille River entrance. Several power cables cross the river between Prosper and Coquille; the least clearance is 68 feet.

Coquille, 21 miles above the entrance, is the distributing center for several agricultural communities of the river valley and has railway connections with the interior.

VHF Marine Radio channels for use on the waterways:

Channel 6 – Inter-ship safety communications.

Channel 9 – Communications between boats and ship-to-coast.

Channel 13 – Navigation purposes at bridges, locks, and harbors.

Channel 16 – Emergency, distress and safety calls to Coast Guard and others, and to initiate calls to other

vessels. Contact the other vessel, agree to another channel, and then switch.

Channel 22A – Calls between the Coast Guard and the public. Severe weather warnings, hazards to navigation and safety warnings are broadcast here. Channels 68, 69, 71, 72 and 78A – Recreational boat channels.

Getting and Giving Help — Signal other boaters using visual distress signals (flares, orange flag, lights, arm signals); whistles; horns; and on your VHF radio. You are required by law to help boaters in trouble. Respond to distress signals, but do not endanger yourself.

Distress Call Procedures

- Make sure radio is on.
- Select Channel 16.
- Press/Hold the transmit button.
- Clearly say: "MAYDAY, MAYDAY, MAYDAY."
- Also give: Vessel Name and/or Description; Position and/or Location; Nature of

Emergency; Number of People on Board.

- · Release transmit button.
- Wait for 10 seconds If no response Repeat MAYDAY call.

HAVE ALL PERSONS PUT ON LIFE JACKETS!

NOAA Weather Radio All Hazards (NWR) is a nationwide network of radio stations broadcasting continuous weather information directly from the nearest National Weather Service office. NWR broadcasts official Weather Service warnings, watches, forecasts and other hazard information 24 hours a day, 7 days a week.
