Intracoastal Waterway – West Bay to Santa Rosa Sound
NOAA Chart 11385

A reduced-scale NOAA nautical chart for small boaters
When possible, use the full-size NOAA chart for navigation.

- Complete, reduced-scale nautical chart
- Print at home for free
- Convenient size
- Up-to-date with Notices to Mariners
- Compiled by NOAA’s Office of Coast Survey, the nation’s chartmaker

What are Nautical Charts?

Nautical charts are a fundamental tool of marine navigation. They show water depths, obstructions, buoys, other aids to navigation, and much more. The information is shown in a way that promotes safe and efficient navigation. Chart carriage is mandatory on the commercial ships that carry America’s commerce. They are also used on every Navy and Coast Guard ship, fishing and passenger vessels, and are widely carried by recreational boaters.

What is a BookletChart™?

This BookletChart is made to help recreational boaters locate themselves on the water. It has been reduced in scale for convenience, but otherwise contains all the information of the full-scale nautical chart. The bar scales have also been reduced, and are accurate when used to measure distances in this BookletChart. See the Note at the bottom of page 5 for the reduction in scale applied to this chart.

Whenever possible, use the official, full scale NOAA nautical chart for navigation. Nautical chart sales agents are listed on the Internet at http://www.NauticalCharts.NOAA.gov.

This BookletChart does NOT fulfill chart carriage requirements for regulated commercial vessels under Titles 33 and 44 of the Code of Federal Regulations.

Notice to Mariners Correction Status

This BookletChart has been updated for chart corrections published in the U.S. Coast Guard Local Notice to Mariners, the National Geospatial Intelligence Agency Weekly Notice to Mariners, and, where applicable, the Canadian Coast Guard Notice to Mariners. Additional chart corrections have been made by NOAA in advance of their publication in a Notice to Mariners. The last Notices to Mariners applied to this chart are listed in the Note at the bottom of page 5. Coast Pilot excerpts are not being corrected.

For latest Coast Pilot excerpt visit the Office of Coast Survey website at http://www.nauticalcharts.noaa.gov/nsd/searchbychart.php?chart=11385

[Coast Pilot 5, Chapter 9 excerpts].

Chocatawthatchee Bay Entrance. East Pass extends into the W part of Chocatawthatchee Bay between Moreno Point and Santa Rosa Island, and is protected by two jetties. The jetties are marked by a light off their seaward ends. Chocatawthatchee Bay Entrance Lighted Whistle Buoy CB (30°22′18″N, 86°30′24″W ), 0.5 mile off the entrance to the channel, marks the approach. To carry the best depths, mariners should be guided by the color of the water. Passage should not be attempted in rough weather. Local knowledge is advised. The controlling depth was 5.5 feet (6.1 feet at midchannel) from Buoy CB to the bridge; thence 9.9 feet through North Channel to the bay. The channel S of the bridge is subject to frequent changes and shoals between dredgings. Buoys are shifted to mark best water. The channel is marked by lights, buoys, and daybeacons.

Chocatawthatchee Bay. Depths in the bay decrease gradually from W to E with 18 to 43 feet in the W two-thirds, except near the shores, and 8 to 16 feet in the E third.

Chocatawthatchee River. The mouth of Chocatawthatchee River is shallow, and boats enter through Cypress River. Cypress River entrance, marked by a light, has a depth of 6 feet. Black Creek, with depths of 8 feet inside, but bars of about 1-foot depth blocking the entrance, leads to the village of Black Creek. Berths, gasoline, a launching ramp, water, ice, and marine supplies are available at a small fish camp on the W bank of the creek 1.6 miles above its mouth.

A channel leads from Chocatawthatchee Bay to a turning basin at the head of navigation S of the fixed bridge at Freeport. The depth was 5½ feet (6 feet at midchannel) in the channel with 8½ to 9½ feet in the turning basin, except for lesser depths along the N and NW edges. The channel is well marked. The bridge at Freeport has a clearance of 5 feet. An overhead power cable with a clearance of 24 feet crosses the channel close E of the bridge.

Access channels have been dug through the spoil banks to a channel along the E bank as far as Ramsey Branch. Depths of about 1½ feet were reported in these channels. A small marina on Ramsey Branch provides temporary bulkhead tie-up, limited marine supplies, and outboard engine repairs.

There are private piers and fish piers on LaGrange Bayou and Fourmile Creek. Gasoline and marine supplies can be obtained on U.S. Route 331 and State Route 20 in Freeport.

Basin Bayou. State Route 20 bridge across the narrow entrance with a clearance of 4 feet. A paved launching ramp is near the bridge and gasoline is available in cans. The launching ramp is accessible at high water only.

Rocky Bayou has depths of 10 to 20 feet and affords good anchorage for small craft. The entrance to the bayou is marked on the W side by a light. A channel about 0.9 mile above the entrance to the bayou leads SE to a marina in Ward Cove. The channel is marked by a private buoy and had a depth of 6 feet. Gasoline, diesel fuel, berths with water and electricity, ice, a launching ramp, and marine supplies are available.

A restricted area has been designated in Weekley Bayou, an arm of Boggy Bayou. (See 334.740, chapter 2, for limits and regulations.) The danger zones of two Air Force proving grounds have been established in Santa Rosa Sound, The Narrows, and the Gulf. (See 334.710 and 334.730, chapter 2, for limits and regulations.) Unexploded ordnance lies on the bottom a mile offshore from Santa Rosa Island, about 8 miles W of Chocatawthatchee Bay Entrance. Santa Rosa Island and the E part of Perdido Key, W of the entrance to Pensacola Bay, are part of Gulf Islands National Seashore and subject to the rules and regulations of the U.S. Department of the Interior’s National Park Service.

PUBLIC BOATING INSTRUCTION PROGRAMS
The United States Power Squadrons (USPS) and U.S. Coast Guard Auxiliary
(GODAUX) national organizations of boaters conduct extensive boating
instruction programs in communities throughout the United States. For information
regarding these educational courses, contact the following sources:
USPS - Local Squadron Commander or USPS Headquarters, 1004 Blue Ridge
Road, Raleigh, NC 27607, 888-367-8777
GODAUX - COMMANDER (OSK), Eighth Coast Guard District, Hale Boggs
Federal Building, Suite 1126, 600 Poydras Street, New Orleans, LA 70130,
800-324-6925 or USCIG Headquarters, Office of the Chief Director (OS-GO), 2700
Second Street, SW, Washington, DC 20260

HIGHLIGHTS
Heights in feet above Mean High Water

AUTHORITIES
Hydrography and topography by the National Ocean Service, Coast
Survey, with additional data from the Corps of Engineers, Geological
Survey, and U.S. Coast Guard.

CAUTION
This chart has been corrected from the Notice to Mariners (NTM) published
weekly by the National Geospatial-Intelligence Agency and the Local Notice to
Mariners (LNM) issued periodically by each U.S. Coast Guard district to the
dates shown in the lower left hand corner. Chart updates corrected from Notice to
Mariners published after the dates shown in the lower left hand corner are available at
nauticalcharts.noaa.gov.

TIDAL INFORMATION
No tidal observations are available for the area
covered by this chart.

Low energy area

CAUTION
Temporary changes or defects in aids to
navigations are not indicated on this chart. See
Local Notice to Mariners.

Improved channels shown by broken lines are
subject to shoaling, particularly at the edges.

CAUTION
Small craft operators are warned to beware of
sovere water turbulence caused by large
vessels transiting narrow waterways.
Note: Chart grid lines are aligned with true north.
CAUTION

Temporary changes or defects in aids to navigation are not indicated on this chart. See Local Notices to Mariners.

Improved channels shown by broken lines are subject to shoaling, particularly at the edges.

CAUTION

Small craft operators are warned to beware of severe water turbulence caused by large vessels transiting narrow waterways.

VHF Marine Radio channels for use on the waterways:

Channel 6 – Inter-ship safety communications.
Channel 9 – Communications between boats and ship-to-coast.
Channel 13 – Navigation purposes at bridges, locks, and harbors.
Channel 16 – Emergency, distress and safety calls to Coast Guard and others, and to initiate calls to other vessels. Contact the other vessel, agree to another channel, and then switch.
Channel 22A – Calls between the Coast Guard and the public. Severe weather warnings, hazards to navigation and safety warnings are broadcast here.
Channels 68, 69, 71, 72 and 78A – Recreational boat channels.

Getting and Giving Help — Signal other boaters using visual distress signals (flares, orange flag, lights, arm signals); whistles; horns; and on your VHF radio. You are required by law to help boaters in trouble. Respond to distress signals, but do not endanger yourself.

NOAA Weather Radio All Hazards (NWR) is a nationwide network of radio stations broadcasting continuous weather information directly from the nearest National Weather Service office. NWR broadcasts official Weather Service warnings, watches, forecasts and other hazard information 24 hours a day, 7 days a week.
